冷凍櫃 PHCL-C017 設定的溫度範圍為 -70°C 至 -90°C，是根據不同試驗案的試驗藥品需求來設定。目前存放於 PHCL-C017 的 V940-002 試驗案，試驗藥品可接受的溫度範圍為 -60°C 至 -90°C，因此即使冷凍櫃的上限設定為 -70°C，該藥品仍處於允許範圍內，沒有超溫的問題。

The temperature range of freezer PHCL-C017 is set between -70°C and -90°C, based on the storage requirements of trial medications for different clinical studies.

The V940-002 trial medication currently stored in this freezer has an acceptable temperature range of -60°C to -90°C. Therefore, even with the freezer's upper limit set at -70°C, the medication remains within the permitted range, with no risk of temperature deviation.
